

Promoter Media Kit Requirements

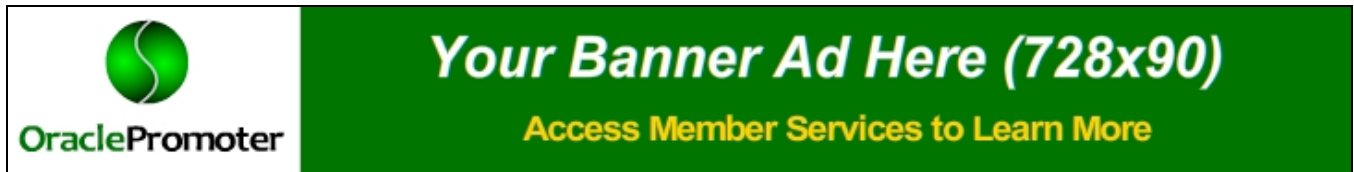

To run social media promotions under a selected promoter program, you must design your own media campaign. Then submit the files you produce along with your paid order to us. When we receive your order and media files your campaign promotion will appear in the Oracle Promoter program you selected. The media specifications below detail the requirements for the type of promotion you intend to run.

Banner Media Requirements

Banner promotions are displayed on the OT Academy website inside our blog and news posts, Member Listing Page, Oracle Radio Page, and Oracle TV Show Page. These types of promotions are also displayed throughout the Oracle Learning Community. Be sure to submit your website URL(s) and contact information when submitting your order. **Note:** Banner promotions can be displayed as images, interactive (flash enabled), or video. Audio can be included in interactive and video promotions only.

OT Academy Banner Types

Leaderboard Example

Display Size	Format	File Size	Resolution
728 x90	.jpg, .png, .gif, .flv, .swf	5 MB max	72 dpi

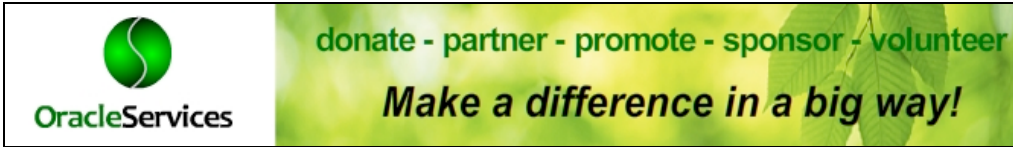

Square Example

Display Size	Format	File Size	Resolution
